EDUCATION

University of Wisconsin-Madison **Madison, WI | 2024-May 2027**

- **Major:** Information Science BS, **Certificates (Minors)**: Computer Science, Product Management, Digital Studies
- **GPA:** 3.85 | **Graduating in 3 years**
- **Related Coursework:** Data Structures, Programming III, Linear Algebra, Data Science Modeling, Computer Engineering, Information Architecture, Interaction Design, Digital Privacy, Graphic Design, User Interface Design, Human Computer Interaction, Consumer Behavior
- **Activities and Clubs:** Design Interactive, Wisconsin Triathlon Team

Cedarburg High School **Cedarburg, WI | 2020-2024**

- **Activities and Clubs:** Congressional App Challenge, Computer Science Tutor, Future Business Leaders of America, National Honor Society

PROFESSIONAL EXPERIENCE

Under Armour **Baltimore, MD | Summer 2026**

Intern, Digital Teammate Experience (AI & Automation)

- Worked across 6 departments to build AI agents and automations, design system architecture, and create UI/UX mockups, turning stakeholder needs into working solutions.
- Partnered with Legal to build an AI agent that answers questions about global entity data, including historical records, by engineering a change-data-capture pipeline in Power Automate and TypeScript that gave the agent memory.
- Worked with the Sourcing & Costing team to build a Copilot Studio agent grounded in their existing SharePoint and Excel tools, answering cost, margin, and factory-capability questions in plain language while also enabling future MCP connections to Snowflake and Centric.
- Designed the architecture for an AV monitoring system with Network and Security teams, building a Power Automate HTTP intake flow and AI agent that turn raw Syslog errors from specialty-space Crestron processors into diagnosed, plain-English ServiceNow tickets with likely cause and next steps.
- Built a multi-agent pipeline in Elementum for the Automation Team that converts technical design documents into complete operational runbooks, cutting a multi-hour manual task to minutes and standardizing documentation quality.
- Designed the UI/UX and information architecture for Technical Design's product standards library, replacing hundreds of scattered SharePoint pages with a visual, filterable interface that narrows constructions by category, cost impact, SMV, and manufacturing complexity.

Kapco Inc. **Grafton, WI + Remote | 2025-2026**

Intern, Head of Custom Applications

- Appointed role of Head of Custom Applications in 2025, leading design, implementation, and optimization of critical custom applications for 500+ employees across the production floor and in the office environment.
- Led the initiative for conversion of legacy Visual Basic applications into ASP.NET web apps, optimizing each for multi-device accessibility between both desktops and tablets at workstations, increasing usability by 100%.
- Collaborated with the IT team on a company-wide ERP migration from Infor Visual to Plex, leading development of API integrations, highlighted through a custom demo app that handles 200 test parts.
- Facilitated frequent meetings with leaders and employees to gather business needs, lead solution design, and translate them to new or existing applications.

Kapco Inc. **Grafton, WI | 2023-2025**

Intern, Software Developer

- Developed and deployed 10+ ASP.NET and SQL backed applications integrated with the company's ERP system to enhance the workflow and efficiency of all employees.
- Optimized core business processes by creating applications for steel purchasing, part tracking, barcode label printing, forklift inspection, and work instructions, reducing potential for manual errors.
- Maintained production and development of SQL databases, queries, and reporting systems to monitor real-time metrics, analyze inventory movement, and support data-driven decision making.

Entrepreneurial/ Small Business Experience **Cedarburg, WI | 2019-2025**

Landscaping Business Owner (Primary) & Window Cleaning Owner (2024)

- Managed a scheduling and operations system for multiple clients, dividing tasks out on a weekly basis.
- Communicated effectively with clients, accommodating for any preferences, and building long-lasting relationships through years of high-quality service.
- Expanded clientele by 25% annually through consistent marketing efforts, including door-to-door outreach, distribution of 300 business cards, and various promotional incentives.
